AutoCAD has been used for various projects, such as architectural, engineering, and other types of designs. Here are a few of the famous AutoCAD projects. The Grace Cathedral, built in the Gothic Revival architectural style between 1884 and 1886, was the world's first purpose-built earthquake-resistant building. The single-vaulted structure is 482 feet (147.5 m) long and 235 feet (72 m) wide and consists of copper-clad steel. The roof is 14 feet (4.27 m) thick, and the foundation is 30 feet (9.1 m) thick of concrete; the total depth is approximately 300 feet (91 m). The cathedral is the largest cathedral in the United States, and one of the largest buildings in the world, with a total volume of approximately 1.7 million cubic feet (50,000 cubic m). The Detroit Institute of Arts, also located in Detroit, Michigan, is a museum of art and architecture with a collection of over 200,000 works of art. The building, designed by Albert Kahn (1874–1957), was completed in 1931, and the Institute moved into the building in 1938. The exterior is faced in limestone, with several entrances and large arch windows. Its architectural style is Art Deco. The building is the third-largest art museum in the United States, with an art collection that includes an extensive collection of European paintings, sculptures, and drawings. The NASA launch complex at Cape Canaveral, Florida, has the largest launch vehicle assembly building in the United States. The complex consists of a pair of 21,000-foot (6,400 m) tall rocket launch pads, rocket assembly buildings, mobile gantry structures, and more. The complex is approximately 3.5 miles (5.5 km) from the Atlantic Ocean and is owned and operated by NASA. The arch bridge in Hartford, Connecticut, is a Pratt truss bridge that carries Main Street across the Connecticut River. It is 67 feet (20.2 m) wide and is listed on the National Register of Historic Places. Built in 1837 by the Norwich and Worcester Railroad Company, it was one of the first 19th-century railroad bridge designs. The American Airlines Center, also known as the American Airlines Center, is a 6,099-seat multi-purpose arena in Dallas, Texas. A: You cannot define constraints in a CREATE TABLE statement. However, Oracle supports this through the USER_CONSTRAINTS view. For example: select table_name, constr_name, constraint_type, constraint_name, constraint_columns from user_constraints where constraint_type = 'F' order by table_name, constraint_name You can define the constraint with PL/
