Live video game play of the Pindad Armored Fighting Vehicle in Armored Warfare. This vehicle is fairly unique, since its main weapon is a multi-barreled rocket launcher capable of firing over obstacles. This makes the Pindad incredibly powerful in both offense and defense. Static enemy targets stand no chance! This vehicle is best used with Commander Ophelia Kitescu and in a platoon - the firepower of such a formation is truly without equal. We received your cry for help The Pindad is a Tier 8 Premium AFV. To find out more about a Premium AFV in the Pindad family, click here: In Armored Warfare, the Pindad is a Tier 8 Premium AFV. It's main armament is an 8-barreled rocket launcher that fires three different types of rockets simultaneously. The Pindad is thus able to fire over and around obstacles, making it deadly in both offense and defense. The Pindad also features a cannon in each turret. The Pindad' class of vehicles was designed for stealthy infiltration of enemy positions. It is very easy to drive, requires only average maintenance and is hard to detect with radar sensors. Some of its more notable qualities include: Flexible and high-mobility Transport The Pindad has excellent transport capabilities. It can serve as the transport vehicle for infantry, engineer and repair vehicles. It can be used as a "bargain" in lite/medium and heavy tank sales, with an armored superstructure. High-mobility The Pindad's mobility is such that it can move quickly and reliably despite the limited firepower. The vehicles, especially the early variants, can even be used for ground assault. Stability The vehicle's balance of motion and weight ensures outstanding stability on various surfaces. This includes clear air or ground, frozen ground or just even sparsely covered ground. Packet radio The vehicle has a packet-oriented radio. This makes it possible to use different radio networks for different tasks and saves significantly on energy. Armored superstructure The Pindad has an armored superstructure, which makes it more difficult to destroy the vehicle from the sides. Armor The Pindad has a very powerful armament as well as a heavy armored superstructure.

## Features Key:

30 shaders for alpha blend  
7 shaders for objects  
4 shaders for bump map/shockwave noisemakers

---

8 shaders for clipping planes  
4 shaders for doors  
5 shaders for explosions  
2 shaders for particles

## Engine

- Physics Fireworks Particle System or IM The Fastest Particle System

## AppGameKit Classic - Shader Pack

- **20 HD\* shaders**Unity Asset Store @ Unity Link Repository
- **10 SD\* shaders**Unity Asset Store @ Unity Link Repository
- **8 - Textures**

## **Bane Of Asphodel [32|64bit] [Updated]**

Dungeons of Honor is a Text-Based First-Person Survival Game Where You Play as a Retriever, A Knight, a Spearman, a Samurai, a Viking, a Thief, or other various types of Characters that play in this medieval history. You take on one of these Classes and hunt for the strong adventurer, or the new Dungeon Master, or warden. Your job is to find him, or her and retrieve items from the new dungeon. You are free to choose the style of gameplay that suits you, play in a real time 2d view, in a isometric view, fight in real time 3d view, or turn-based. Dungeons of Honor features, a tavern, a trading post, a throne room, and many other places to visit. Items that you will pick up while playing the game, will add to your Item Pool. Some of the items will be shields and clothing to protect you from injuries while you are in the dungeon, or more powerful weapons that you can use to increase your survival chances. Weapons will also have different effects, add to your survival chances. For example, a Longsword will make your health more susceptible to attack. You also get a chance to find old weapons while scavenging. Dungeons of Honor features a leveling system, where you play an old warrior, and you will find weapons and skills that will improve your character and increase his ability to survive. -Determined by a Random Number Generator- Goals: I want to create a text-based, first-person survival game, that will be a good entertainment for a couple of minutes. Would like to develop it to a sequel, with more content and more available weapons, and new maps. If you enjoy it, a bit of word of recommendation will also be the most welcomed. Pack Name Dungeon Of Honor Trailer Screenshot Video Project Assets I have included some of the parts that I used in the trailer, as well as the finalized version. Preview On the top of that, more Info and Trailer on the final version will be available soon. To be honest, it is actually not that bad. What you need to do is not to focus on fitting the graphics (though a lot of people complain about the visuals), but on creating something. There are a lot of good text-games out there, but I think you might get a much bigger response here, since you c9d1549cdd
