It's like the chance to multiply all your experience gained by 2 or 4 or 6 or 10 times depending on what weapon skill you reach. As long as you keep leveling up, you could even double your experience gain by a single level! In this game, the time required to train is equivalent to about one single level up. There are two types of equipment and skills. There is a kind that has the "payable" effect and some that are "free". If you pay to equip a skill, you will be able to use the same equipment together with different skills. Equip just one skill to level up to the next one and it's free equipment. Equip 2 or 3 skills and it will be paid equipment. All this can happen at the same time. So the ultimate goal is to reach the required "payable" equipment to gain the "payable" skill. CLAIM YOUR POWER. Choke on the grudge of

your enemy and stand up! Taking your revenge is what you think that you should be doing, right? Wrong! You should be going further than revenge! By thinking, you are only piling up unnecessary enemies... We are here to put an end to that mindset. In this game, the more enemies you fight, the more experience and more EXP you will gain. "Rising from a Myth" action RPG from RPG maker "Satellite", The New Fantasy Action RPG (NSW2013) has the jolt of being different from most RPG released in this generation. Players are not just assigned a character at the beginning of the game, but they are also told to start their character's life from the beginning. The player is free to choose their own names, classes, and skills. In other words, it makes the game open to the player's choice of level and strategy rather than being told, "Your character's level has to be this. His class is... blah blah blah." As far as gameplay is concerned, this is the standard RPG fare like the legendary Final Fantasy series. Your character can move around on the field and talk to people and fight off the enemies. Online, there is a real time battle where you can battle online with your friends and other players who have also played this game. Also, you can choose your own character class and item/equipment. In short, you can make a character by yourself or you can get the direction as to who your character should be like a mascot or a celebrity. What I liked about this game: It is a RPG but it is unique in terms of allowing the player to be in charge of choosing their own path from the get go. What I disliked about this game: The "just start with a blank character and play your own adventure" way of the game can be grating to the player who doesn't really want to play like that, making them feel stifled. In addition, it may not be the best for beginners to play this game, as there are a lot of new concepts to grasp that are not necessarily intuitive. NOTE: I am still looking for a fan translation of this game. I will try to update this post as soon as I find the fan translation.
