Niantic Inc. Tue, 26 Feb 2018 10:00:00 +0000 Cygames, We will now be updating the Niantic Open Beta Beta to the latest version in our test and once testing has been complete, it will enter the beta period. Once inside the beta period, we will of course contact you with any pending issues as well as upcoming changes or features.

The Niantic Open Beta Beta has reached the testing phase of the Iron Mole Update which will be officially implemented on February 12th at 00:00 UTC. The Iron Mole Update will be available to players all over the world that have installed the latest version of the Niantic AR app. This will mark the official release of the Iron Mole update that was previously incomplete due to two main reasons. The first being that we were still finalizing the system requirements, and in particular the size of the download for these updates, this new update will be significantly smaller in terms of file size. Additionally, we had implemented some minor changes and were testing them when the players reported some users having experienced issues. After going back to the complete updates we have made some changes that solved these issues along the way and the update will be able to offer a smooth and stable experience and it will be even more attractive for players.

---

We hope you enjoy your time inside this Closed Beta and have fun and thanks for your patience on our side. For informations regarding this new update phase, go to Posted, post news and events to the web, share your photos and gain access to exclusive discounts,
