FIFA Ultimate Team Leagues - Compete in either a single-season or a multi-season league to win prize money, climb league ranks, and watch the competition heat up across your leagues with new player cards and more. Here are the names of the people behind FIFA on iOS. There is a lot of knowledge to be gained from the source: I had the pleasure of playing with another or maybe better as he has just walked home from work a beta yesterday, so this will be my first proper review of the game, as promised. The review will be made upon iOS 10 being activated on the iPad Pro by Daniel Hope. Video Format: I have no idea what we will be recording and getting done on the iPad Pro as I can't see myself doing it on there, I just use the extra space on the Mac side of things and hold it out of the way as a second monitor as I can't even be bothered trying to get it to work on its own. I know for a fact that the same can be done with the old iPad Pro on iOS 9, so it's not as if I am new to that situation. Anyway, enough rambling as I am enjoying myself and enjoying playing the game, I hope you enjoy it too. PRAISE: The controls in this version are tight and you are able to get a full range of inputs, it is responsive and robust. This game also proves to be a rather classy job of modelling and lighting, overall some nice eye candy to the game. The game is pleasing to the ear and the soundtrack is a gem, it really sets the atmosphere. It feels a bit like I am playing Shadow of Mordor with a sense of adventure added to it. I also like the fact that when you talk to the shop owner, there is a cool cutscene that plays before that happens. The story is not too much and is good and informative, but enough of that. I am enjoying it a lot and will be enjoying this whilst playing it. As I keep stressing, I am still new to playing this game, but I enjoy it so far. SHOTS: You are able to lock and unlock
