Voice activated phone answering system for home or office (VOXPhone), telephone answering, voice recorder & more.GRAIN PRODUCTION AND NUTRITIONAL VALUE INDEX OF MIXED GRAINS. Nutritional quality of milled grains was assessed with the use of the methods of Nutrient Value Index (NVI) and the Grain Production and Nutrition values (GRUNIT) model. The GRUNIT model was developed for the purposes of assessment of the nutritional value of a group of cereals and cereal products obtained with the use of a compound method. A set of parameters was used which included the production of human millet and rice, the national-scale production of wheat, rye and barley, the gross energy content of grain and its dry mass, the percentage of energy of grain and its dry mass, the energy value of consumed grain products (bread, ready-to-eat cereals, pasta, soup, meat sauce, etc.), and the energy per serving. The numerical coefficient of the elements in the model matrix is defined and the energy coefficient is included in the product of the matrix multiplication 0cc13bf012
