Plumbing Isometrics is a tool to draw pipes in a new way. Being able to draw isometrics is not new, but before, a tedious way to draw lines was to add then remove them. You would have to move the center of the pipe line and align the pipe line and draw. Plumbing Isometrics is much easier. Draw the lines, and once they're drawn, the line and center is automatically aligned and the pipe is moved into place, you just have to grab one handle and rotate it in one direction or the other. Some benefit: • Easy to use • Not complicated • It is easy to see and understand • Can create isometric pipes • No Need to draw • Easy to resize • No Need to add or remove lines • Easy to use • Just enable the tool and select the pipe symbol. When you zoom in (the picture is created in high resolution) you can see where the circles are placed automatically. Try it!
