Many vehicles with wheel slip control such as traction control, stability control, Anti-Lock Brakes and Electronic Stability Control are used on precarious urban terrains. A review of the scientific evidence was performed to assess the effectiveness of these technologies. A systematic search and a focused review of the scientific literature was conducted on the topic. Controlled laboratory studies and road-test evaluations in a field setting were included. Additional field studies were considered if high-quality laboratory-based evaluations were not available. The quality of the evidence was assessed using the GRADE (Grading of Recommendations, Assessment, Development and Evaluation) methodology. The literature search revealed 62 papers of varying quality, and 6 additional studies were included. In laboratory experiments, wheel slip control systems had a limited ability to adjust to the varying stability conditions of slippery or diverse terrains. On the real road, the effectiveness of the systems in reducing vehicle crashes and the car's ability to maintain a safe distance from other vehicles were not obvious. No generally accepted performance standards or road safety regulations exist for wheel slip control systems. The ability to effectively apply wheel slip control technologies is limited by the inability of the systems to adapt to the various conditions that occur on the real road. Therefore, it is recommended that tests are conducted under test conditions on all types of road surfaces, to determine the effectiveness of wheel slip control systems under the various road conditions found in practice.

Weddings I am a wedding photographer based in Sydney. I love to capture the emotion and emotions that happen in a wedding day. I love to shoot in candid moments, I love to shoot a number of looks for different occasions, I love a couple who brings their own creative and fun attitude to their wedding. I have been shooting weddings since I was 20 years old. I love the story telling element that comes with every wedding, because I love to find that extra little thing that will make your day a memory you will always want to remember. I have a very laid back approach to weddings and I would love to get to know you and your story for your wedding day. The biggest factors that influence your wedding photography is you and your photographer. Your story, your likes and dislikes, your personality, etc.Q: Visual Studio 2015 RC installed I installed Visual Studio 2015

So I decided to look if there is any sort of pdf of it. So I searched and found the same exact pdf that I could find to download. They work normally. It is still there. I am using chrome 32.04.0664.0 on Windows 7. I am not sure about others but for me having a pdf version of the book would be ideal because I can save it and can carry with me instead of having to lug around the physical paperback. Is there an easy way that I can get a pdf version of the book? Thanks, . A: The epub format can be read with Apple's iBooks or similar programs. The html file can be read with anything that supports html. The pdf format can be read with Adobe's Acrobat Reader. A new method of trauma prevention: medical professionals' experiences. This qualitative study was developed to understand how trauma prevention is experienced by doctors, nurses, and other health professionals who work with patients. We used a phenomenological method, based on Colaizzi's framework, to gain an understanding of participants' experiences. Eleven researchers and research assistants individually conducted interviews with a total of 72 participants using a semistructured guideline. Two researchers independently read and sorted the transcripts line by line and identified a subset of the lines, represented by a code, based on their unique meaning. The researchers then generated codes and grouped similar codes into categories, and finally these categories were synthesized into two broad, meaningful themes. The thematic analysis revealed two main themes with subthemes. The first theme was empowerment and development, and the second was collaboration. The first theme included empowering teachers, empowering patients, empowering self, and empowering others. The second theme included awareness of fear, empathy, compassion, and honesty. Our results showed that knowledge acquisition can empower physicians, nurses, and other health professionals. Participants' experiential knowledge gained from their training, and from handling individual cases, taught them to see themselves as victims, which reduced their feelings of helplessness in the difficult situations in which they found themselves. Healthcare professionals' awareness of fear, empathy, compassion, and honesty

reduced their feeling of helplessness and enabled them to see beyond the immediate individual to the patient as a whole person. The results of this study provide insights that can guide future approaches to trauma prevention. 0
