You may find that Photoshop's power, flexibility, and usefulness may exceed your needs. If you aren't using Photoshop, it is worth checking out. However, even if you are a professional, you may still need to enhance images with Photoshop.

The program is frequently used for retouching portraits of people and changing the color of objects. It is used for creating logos and adjusting portraits. It is used for creating CD cover images and on the Web. It is the go-to software for adding eye animations and for manipulating images to create effects like those seen on movie posters. Photoshop is the perfect image manipulation software for those creative professionals and amateurs who create images and websites. In this chapter, you find out how to open and close a file, work with layers, perform basic image adjustments, create and work with gradients, extract and change images, and then polish the edges of an image, as well as embed files into a

Photoshop file. Changing File Sizes and Saving Files If your photographic editing software allows you to create Photoshop files, you can easily manipulate these images for your own use. Of course, before you do anything with the file, you have to have an appropriate file format for your image manipulations. In the following sections, you discover how to open, save, and close a file. You also find out how to open and save Photoshop files, how to change the size of a file, how to save with a resolution, and how to save your changes. Opening a file You can open an image file in Photoshop by choosing File⇒Open or by pressing Ctrl+O (Windows) or ⌘+O (Mac OS). When you open a file in Photoshop, the file opens on its default Photoshop window. Some Photoshop file types are available for you to choose, such as JPEG, GIF, and PSD. Saving a file After you've edited an image, you can save the file to your computer (or use a folder), put it on a CD, and share it by e-mail. To save a file to your computer, follow these steps: 1. **With the image you want to save open, choose File** ⇒ **Save or press Ctrl+S (Windows) or ⌘+S (Mac OS).** ** If you choose Save, the Select File to Save As box opens; on the Mac, the Save As box opens. 2.

Check out our blog for more free Photoshop alternatives. In this tutorial, we'll show you how to use Photoshop on a Windows PC to make your own simple graphics, logos, images and memes. You'll learn how to use Photoshop tools like the Shape Tool, the Brush Tool, the Pen Tool, the Clone Stamp Tool, the Healing Brush Tool, and the Selection Brush Tool. You'll also learn how to use Photoshop's powerful effects to make your images look professional and unique. Tutorial details Difficulty Medium (intermediate) Estimated total time 1 hour Installing Photoshop on Windows Adobe Photoshop is built on top of Adobe's other proprietary software, like Adobe Illustrator and Adobe InDesign. To install Photoshop on a Windows PC, you'll need to download and install these three programs. You can install Photoshop on your computer for free (the trial version), but we recommend that you purchase a license for Photoshop. The cheapest is the \$9.99 monthly subscription called Photoshop Elements, but the \$149.99 annual subscription, called Photoshop CS6, is the most popular. The free Photoshop Elements license is fine for basic editing, but if you want access to all of Photoshop's features, the annual subscription is your best option. Each Photoshop license comes with a free 30-day trial, and you can create a trial license for up to five additional people in your household. You'll need to download the trial license and make sure your friends and family can access it with their own Adobe account. So when you're ready to buy Photoshop, you'll be ready to edit, retouch and create great-looking images with Photoshop CS6 or Photoshop Elements.

1. Install Photoshop CS6 or Photoshop Elements on your computer You can purchase Photoshop on its own, or you can purchase Photoshop with either Photoshop Elements or Photoshop CS6. To install Photoshop, go to the Photoshop website. Select which version you want to download, and download it to your computer. You'll be asked to sign into your Adobe account when you install Photoshop Elements or Photoshop CS6. If you don't have an Adobe account, you can create one. 2. Open the program to access all of Photoshop's tools Start Photoshop by double-clicking its desktop shortcut or right-clicking the program icon 05a79cecff

. "It's not a grassroots thing where people just get on with it. We've had a lot of people coming forward to tell us what they want and need to be done. People understand there's a gap in services for them. There are other kids who don't want to go to sex offenders' homes and have their mum and dad there. They want the structure but we can only do what we can do." Barnaby Joyce was unavailable for an interview, but his spokesman said: "Since the proposal was made people have been unable to contact, say or do things. We have had hundreds of thousands of messages, phone calls and emails and we have been frustrated and inundated with things from people. It's not a grassroots thing where people just get on with it. People understand there's a gap in services for them." A spokesman for Ms Gillard also said there had been massive levels of public interest in the project. "There's a lot of public interest in this project from the plan itself to the opportunity to be able to learn, to be able to participate in the project," the spokesman said. "It's not a grassroots thing where people just get on with it. People understand there's a gap in services for them. "There are other kids who don't want to go to sex offenders' homes and have their mum and dad there. They want the structure but we can only do what we can do." The report was presented to the prime minister and her cabinet last week, with the Senate committee proposing a number of recommendations that could be used to provide tailored treatment programmes for each sex offender. At least 25 of the recommendations directed specifically at state authorities were rejected, but four key recommendations that would assist the federal Department of Health and Ageing include: a trial of non-custodial supervision in probation; a trial of community based family counselling; provision of "specialised in-home services" and funding for a "family network". A spokesman for the Nationals leader, who has long been an advocate of sentencing reform, said she believed the report "not only puts forward some good ideas, but could actually save lives". A spokesman for Mr Joyce said the document "makes the case for why we need to bring the issue to an end". "We are in favour of this, it's a good initiative, it

To use the Clone Stamp, use these steps: 1. To activate the Clone Stamp, click the Toolbox icon , and select the Clone Stamp tool. 2. Pick an area of your image in which you want to copy pixels. The pixels you copy will appear as little dots in the background of the image. The dots on the picture and those on the background are different colors, so they don't blend together when they are pasted. 3. Press -Z to Zoom in and out. Then move the cursor over the area where you want to paste the pixels. The cursor becomes a little dot. 4. Click and drag to copy a pixel. You can also right-click and click Clone to copy the pixel. 5. A dotted border appears around the cloned area, marking the boundaries of the pixels you copied. 6. Click the Eraser tool or in the Toolbox, to cover the cloned area. Be sure to use a soft brush. 7. To return to the Clone Stamp, select it from the Toolbox and then press the Alt (Windows) or Option (Mac OS) key. 8. If you have trouble pasting the pixels, double-click in the Canvas to switch to the Selection tool. Then press . Click over the area where you want to paste the pixels. You may need to continue pasting in small batches. 9. When you are done pasting the pixels, press or click the Eraser tool . 10. If the background shows through, you may need to use the Eraser tool again to erase the cloned pixels. 11. Repeat steps 6 to 10 until you get the pixel color and area size exactly the way you want it to appear. You can also use the Gradient tool to create color fades in an image. The Gradient tool lets you control colors across an image area by blending one color with another. When you create a Gradient, you control the angle of the color fill. Here's how to use it: 1. Select the Gradient tool . 2. Click anywhere in the area where you want to make the gradient. 3. To choose a color, click the Eyedropper tool . The Color Picker appears. Click the color you want
