Comedy Few things are more important than a good joke. But
what you actually say with the joke matters almost as much as
how you say it. When comedians and television writers create
jokes, they want to make sure that no one is ever going to
misunderstand the punch line, even if people actually do
misunderstand. In addition, they are careful to create jokes that
feel natural, so that the audience never feels like they are being
insulted. Comedians also want to make sure that they aren't using
racial slurs, or crass, or downright offensive language. This is why
almost every television show has to be censored—not only to
protect the sensibilities of the United States of America, but the
sensibilities of the people who are watching the show. There are,
however, certain jokes that are universally understood and will

never get censored. For example, the one line in the famous “cheese and rice” joke: “You like rice? You’ll love cheeeeeeeeeeeese.” The fact that no one can argue about a joke like this should tell you how essential a good joke can be. The trick, though, is to find a joke that is not, at least on the surface, offensive. And finding such a joke is no easy task, because on its own, every joke is offensive. That’s why comedy is a very subjective, and individualized, art form. Each comedian has to sort through all the limits imposed by society in order to produce a joke that is insightful, powerful, and funny. This is why the history of comedy is so important. You might think that telling a joke is an easy matter, but there are a lot of hurdles that you have to go through. For example, you have to gain a sense of how your audience will react, how much people will expect from a joke, and how to make the joke funny. Additionally, the joke has to resonate and be appreciated on a level that is beyond your individual self. You also have to use the right words. So this is why while the history of TV is important, so is television itself. The History of Television Television has been around for over a hundred years, and it is true that in that time, many comedians have come and gone. However, some of them were legendary, and some of them were so famous that their legacy will never be forgotten. It is this that makes the history
