Tummy Tuck (Abdominoplasty) Surgery

What is Tummy Tuck Surgery?

Tummy Tuck surgery is a surgical procedure to remove excess skin and fat from a patient's abdomen. It is most often performed to get the "cute" tummy that you see in a swimsuit in the summer. Many women will say that their post-baby tummy is too

"large" and they'd like to have it "tightened up" to help bring it back in shape. Other reasons for doing Tummy Tuck surgery include: ✓ Occasional rounder and fuller figure

✓ Avoid the "beach body" look

What does the Abdominoplasty procedure involve? The surgery involves more than just removing the loose skin and fat. It involves reinforcing the abdominal muscles and tightening those muscles in order to reduce the appearance of bulging abdominal wall (visceral muscles). It also involves cutting and suturing the skin to tighten the abdominal wall. The

abdominoplasty is a long and intricate operation. It takes a few hours to perform and will usually leave the patient with some
