
PATCHED MiniPE.v2k5.09.03-XT
Updated 2008.08.20 UPD

[**Download**](#)

I made Ghost with an outdated miniPE boot CD from Digiwiz. Malwarebytes and downloaded updated MiniPE-XT V2K5.09.03 ISO from ... It works fine, but I noticed some actions in the user interface. I also noticed that some messages (usually errors) are only displayed in "user" interface mode, but not in "master" mode. When I am in "master" mode and use the "Detect" option, I get an error message: New device detected in "Bootable Diskette". Device on disk: \\Device\\Harddisk0 (or

\\Device\\Harddisk1 in some cases).
