# Desmume Cheat Database Download !!TOP!!

```
desmume -n game -e "cheatdbindex" -c  
"cheatdbfile:99,mapname:file://0:/x07a1fefa100230/x0/x07a1fefa100230/d26:0,cheatindex:99" desmume -e game -n  
"example_command" -f "example_filename" desmume -e game -n "example_command" -f "example_filename" desmume -e  
game -n "example_command" -b "example_badcheatnumber" desmume -e game -n "example_command" -b  
"example_badcheatnumber" desmume -e game -n "example_command" -w "example_wildcheat" this tells desmume to: after  
loading into a game and choosing the save state for certain game, you can press start on the xl or 3d xl screen to continue into  
the next game. the different cheats for different save states will be active. the cheats will be listed one at a time, after pressing  
start. the "frozen" checkbox makes it so that the number's value cannot be changed. so when the game does the tricky thing  
of cycling the value back to the invulnerable state, it can't change the value. it just stays the same. this cheat database has  
been made using a programmed program, but i have no idea what the program is or how to get it. it's for the xbox 360, but will  
work for everything else. i've tested it on the xbox 360 version of the game. *to go back to default settings, click start again in  
the main menu. this will set the number back to what it was before. to set a number back to invulnerability, simply type reset  
in the search menu. 1st edit the rom by removing any saving/boot protection so it would work without the game protection  
code. (tap load and disable)2nd.zip the rom to the sd card. (system partition)3rd load the game, enable cheats, and go have  
fun.
```

## Desmume Cheat Database Download

All of these systems will require the SSBB Installer to be able to utilize the cheats. If you are unfamiliar with installing RetroArch or have questions about it, check out the RetroArch wiki here: [https://www.retroarch.org/wiki/index.php/Main\\_Page](https://www.retroarch.org/wiki/index.php/Main_Page) If you played the game for the first time with the Quick Start screen (the first screen you see when you start the game), then you just need to activate the cheat menu. To do this, press the L, R, Y or X buttons when the Mewtwo comes out. This is the cheat menu screen. Using the A, B, C or D buttons on the top screen will navigate the cheat menu (note that this menu is specific to Black and White). Then locate the game you wish to use this cheatcode for and press the little 2x2 icon or 2x button. Then press select and you will be taken to a menu. In that menu look for the cheats section press A then select it then press B to exit. If you havent got a code yet, check out the page for more info on becoming a member and downloading codes. You shouldnt need to register either, you shouldnt need a PayPal account and the sites is very safe. You can be sure that all the codes are updated for the latest version of the game youve bought and they are updated to you. When you have the code you will know what button to press as they are for each games controls. Do it right and you will be getting free EXP for games. Do you know of a cheat for a game you wish to play thats not on here? If you do please contact me at one of my websites or by email at greentea894 at yahoo dot co dot uk. Also if anyone has any questions about cheats as i have all the answers. Just hit up on the contact page or email me. Cheers, JS. 5ec8ef588b
