Folder Transfer is a freeware client for Windows NT/2000/XP. You can transfer files and folders by local network or the Internet. You can browse the folders on another computer on the local network or the Internet. And you can schedule file transfer, download multiple files, and find out the file transfer progress. Browse the folder tree on another computer on the local network or the Internet. Download multiple files at the same time. You can monitor the progress of current transfers by accessing the dedicated tab. In addition, Folder Transfer can transfer files over the Internet using any FTP, FTPS, SFTP and TMP protocols. Send files to multiple destinations automatically at a time. You can transfer files by the first time or schedule transfer and download files from the FTP server. You can find out the file transfer progress when you transfer files or download files from the FTP server. You can monitor the progress of current transfers by accessing the dedicated tab. In addition, Folder Transfer can copy and move files from one computer to another computer on the local network or the Internet. Copy files to the local computer using the first time or schedule copy and make copies. You can find out the file transfer progress when you copy and move files from one computer to another computer on the local network or the Internet. Find out the source folder and destination folder which files you want to copy. You can find out the file transfer progress when you copy and move files from one computer to another computer on the local network or the Internet. Configure the folder tree on another computer on the local network or the Internet. Folder Transfer provides users with a simple, intuitive and secure means of transferring files and folders over a Windows network can sometimes be difficult. Doing the same thing over the Internet without making use of e-mail or other similar services, even more so. Configuring the application and connecting to other computers is easy and quick The application is easy to install and configure. The setup process is automated and requires little user input. Once it is complete, users can begin configuring the program. Although many network applications are complicated and difficult to configure, this one is not. One simply has to select their computer's LAN address and a suitable port from a list. Once Folder Transfer is launched on another machine, it will automatically look for other computers on the network that are running the same program. Folder Transfer can just as easily be configured to share documents over more complex networks using the Groups feature.
