Lightroom, the company's professional photo editing software, has also seen a number of big new features announced in the last year. Lightroom now lets you make edits to JPEG and RAW files, and if you're using Lightroom in a work group context, you're able to see who made particular edits, all without using linked files. Lightroom also now lets you create and manage your own presets, much like the existing Lightroom presets. The presets appear in an entirely new way in Lightroom, allowing you to create, name, and preview them with ease. We also now have 2015-quality customers who use Lightroom as their sole editing platform. The big addition here is a Serial Uploader, which means you can now use Lightroom in a more efficient way—for example, by being able to take 10 images or more, and without having to link each one—just put them in a single folder, and then share out their versions up to 5 times.
